

TITAN

AIR CONDITIONING

A member of the
Australian Refrigeration
Council RTA No. AU27682.

Your air-conditioning system is one of those things that you set and forget – until something goes wrong.

That's when you need Titan Airconditioning.

Beau Hastings is more than an airconditioning installer and repairer – he is focused on offering his customers the best possible service at the best possible price.

When you deal with Titan you are dealing with the business owner – not some faceless call-centre operator – and this means personal service and quality guaranteed to suit your needs.

Beau lives up to his company's namesake – strong, reliable, experienced, trustworthy.

But don't just take our word for it...here's what Titan's customers have said:

"I called Titan Airconditioning after my house was broken into and my airconditioner was stolen... Beau not only managed to fit me it within a couple of days, but did a fantastic job at a great price. I was so pleasantly surprised when he didn't try and take advantage of my need for a speedy installation, as many other companies do with surcharges and additional costs added on. What I was quoted was what I paid. I could not recommend Titan Airconditioning more highly. Everything Beau did, right across the board was of the highest standard, but the best part was that he did it with a smile on his face."

Amanda Simpson
Salisbury City Council

"When our commercial tenant's airconditioning unit broke down, we contacted Titan Airconditioning. Not only was the service fast, efficient and top-class, but it was hassle-free for our tenant and didn't interrupt their business"

Joseph Spagnoletti
Sales & Marketing Manager
Loumet
Metti Trading Pty Ltd

So if your airconditioning maintenance contract is ready for renewal, or you are not satisfied with your current contractors, why not give Titan a try? You won't regret it.

With years of experience behind him, Beau knows airconditioning. So, whether you have a reverse cycle or evaporative system, call Beau Hastings from Titan now on 0410 132 141 to discuss your maintenance options.
